

Step 3: Now, the challenge statement says, “not all incorrect inputs are rejected” which clearly means this question is to be solved using SQL injection...but it’s not as simple as it looks. Let’s try inputting a basic vulnerable SQL query: ‘ **OR 1=1 --**

Bypass fails...but why?

Hint 1: The Invisible Shield

The problem statement says, “the system appears to reject malformed input aggressively.”

Step 5: Click on “Authenticate”. What you get: **Cruxhunt{b4l4nc3d_qu0t3s_m4st3r}** – This is your flag!
